Euro Bungee is the leader in high performance bungee jumping and we provide different size harnesses for the jumpers so don't be fooled by cheap bungee trampolines that are much smaller and won't perform as well.

To Your Event!**

This 130' long dual lane water slide features two launch ramps that send the riders flying in the air to the landing bags. One lane is completely straight down so you experience a free fall sensation before being launched in the air, the other side is very steep and launches you further down the air bag so you can experience two different rides on the same slide. This is the most extreme inflatable water slide available and can only be found at Gravity Play Events. In relation to the work involved, set up and take down, we have this water slide priced very reasonably. We make sure all the details are covered so you can have the best experience possible. We offer up to 5 million in liability insurance coverage with this slide (at an additional cost).

Minimum  
space required  
40' (12.19 m) wide  
45' (13.71 m) tall  
87' (26.51 m) long

Our new 43' tall Over the Edge water slides are the hottest things going at summer events. After sliding down this amazingly tall/fast slide, riders fly over the edge and land on Zero Shock stunt bags, the same landing bags found on our 51' Skyscraper Slide, Stunt Jump Tower and Inflatable Cliff Jump. We have 2 of these amazing water slides available for rent so we can put them side by side for twice the output at large events. We offer these slides with the stair case either on the right or left side. This is a big plus when putting them side by side so the stairs are on the sides and both landing bags in the middle. It's also great if you plan on having this slide at a residence or place with limited space. Being able to have the stairs on a certain side lets you control where the people enter for better supervision and use at some events.
